

CLOUD VIDEO MEETINGS with coSPACES

Powered by **acano**

Always-available coSpaces are the heart of SPS Cloud Video Meeting service, powered by Acano. A coSpace is a virtual meeting room that's always available, with no reservation. Create unlimited coSpaces for every project and team. Notes, agendas and attached file links are available at any time.

BENEFITS:

- / Users can join video meetings using a wide range of endpoints — desktop and mobile clients, Lync 2010 and 2013, Skype for Business, and WebRTC — with one consistent user experience. Use multiple devices at the same time to put video and collaboration content on the best-suited devices for a higher quality user experience.
- / Because the service is provided through the cloud, there's no on-premises infrastructure or IT support requirement. Service and operations are delivered by SPS through our 24/7 Technical Service Center (TSC).
- / Leverage prior investments in any standards-based infrastructure, including Skype for Business and Cisco environments (Telepresence, Call Manager and VCS).
- / Complies with major public-sector encryption and government security standards.
- / The service includes user training and help desk support to reduce support required from your IT staff and help make the most of your VMR coSpaces.
- / Microsoft Outlook integration makes it simple to schedule video meetings.

*Unite diverse
connections
in coSpaces*

Purchasing video meeting capabilities “as a service” makes financial sense, providing a true operating-expense (OpEx) model with flexible subscription options that scale to meet your business needs.

FREE TRIAL

TRY IT FOR 30 DAYS WITH NO COMMITMENT.

Your free trial includes one coSpace virtual meeting room for up to 7 participants, with unlimited video and audio usage, Skype for Business and WebRTC connectivity — plus support from the SPS Technical Services Center.

Getting started is easy!
