

VIDEO MEETINGS IN THE CLOUD

Powered by  Polycom

SPS Cloud Video Meeting Service is an easy-to-use meeting service offering enterprise-grade video and audio capabilities. Powered by industry leader Polycom, this service provides turn-key collaboration tools, bringing together your employees, partners and customers.

BENEFITS:

- / Users can join video meetings using virtually any endpoint — with clients for the desktop, mobile devices and web browsers, and support for Skype for Business support (formerly Lync) and most standards-based video conferencing endpoints.
- / Procuring video meeting services through the cloud means no on-premises infrastructure or IT support is required. Service, operations and end-user support are delivered by SPS through our 24/7 Technical Service Center.
- / Because utilization demonstrates high return on investment, the service includes performance reporting that makes it easy to monitor your organization's use of the service, with clear guidance on changing plans or increasing allocations.
- / Personal web portals give users complete control over their Video Meeting Room (VMR), including presentation, layouts, participant access and mute.
- / Meetings and content can be recorded in full high-definition (HD) video.

Purchasing video meeting capabilities “as a service” makes financial sense, providing a true operating-expense (OpEx) model with flexible subscription options that scale to meet your business needs.

Bring people together – anywhere, any time, on any device

FREE TRIAL

**TRY IT FOR 30 DAYS
WITH NO COMMITMENT.**

Your free trial includes a VMR for up to 10 concurrent participants, with unlimited video and audio usage, and support from the SPS Technical Service Center.

Getting started is easy — use any device to host your meeting.

FREE TRIAL

FEATURES:

- / Connect and collaborate with clients and colleagues on a personal VMR with HD video
- / Simple connections include audio dial-in with dedicated bridge number and host PIN
- / No scheduling or reservations – just send ad-hoc invitations and enter your VMR
- / Start small with a single VMR for 5 or more users ... or scale up!
